"Woman Owned Small Business"

Sound and Multi-Threat Door Systems

Palmer's Security Solutions is dedicated to advanced innovation within the security door industry. PSS door systems are engineered to achieve the highest levels of performance while meeting the needs of security, life safety, and accessibility.

PSS LOW PRESSURE TO EGRESS sound rated door systems are available in STC 45, 50, and 53 ratings. These door systems swing with less than 10 pounds of force.

PSS MULTI-THREAT door systems can be engineered to meet the highest levels of blast, ballistic, forced entry, sound, fire, and RF levels of protection.

PSS has past performance recognition from the USG including the Pentagon for door systems supplied and installed.

PSS offers certified installation CONUS and OCONUS.

Low Pressure to Egress Door Systems

Sound Rated and Multi-Threat Doors

"Woman Owned Small Business"

STC 50 "Low Pressure to Egress"

(PSSSTCLPE50)

Palmer's Security Solutions is dedicated to providing low pressure to egress higher sound rated door systems.

The PSS Sound Rated Door Systems are made in the United States and are STC Rated by Riverbank Acoustical Laboratories. All door systems are designed for field adjustments to the door frame.

The PSS door system partners with Zero International and Surelock McGill to provide a higher sound rated door system with the industry leading ease of opening at under 10 pounds of force.

Door systems can be factory primed red, gray, or white. Industry standard door sizes are available with the option for a removable mullion.

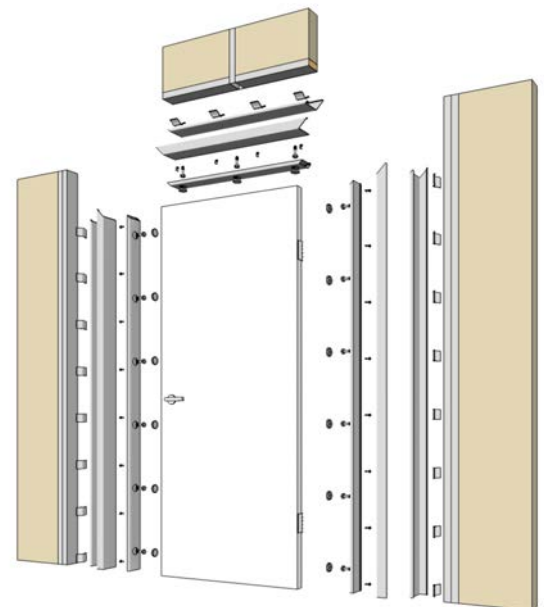

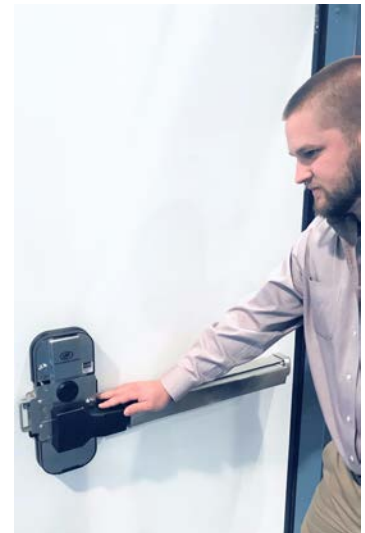

PSS offers certified door installation both CONUS AND OCONUS.

Door System Highlights

- Low Pressure to Egress
 - Split Frame Design
- Field Adjustment Available
- Staggered Hinge Pattern
- Removable Mullion Option
- Manufactured in the United States
